(54) Title: APPARATUS AND METHOD FOR MIXING COMPONENTS

(57) Abstract: In an apparatus for mixing components in a mixing chamber, those parts of the mixing chamber which will come into contact with the components are defined by a foil material which can be renewed between two successive mixing/processing operations. The mixing chamber may be defined between two co-operating mould parts. The mixing/processing chamber also may be defined by the foil material itself. In a method for mixing components in a mixing chamber such a foil material is renewed between two successive mixing operations. Further there is provided a pre-shaped elongate web of foil material for use in an apparatus.

**\* Special categories of cited documents :**

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- \*Z\* document member of the same patent family
